LaunchCommand AI Prompt Guide

Generate Pro-Level Content for Your Bot Using AI

Use any AI to help you generate this content. We recommend ChatGPT. It is what we use.

[Click here to access ChatGPT](#)

1. Project Context Setup

⚠ (Start every new chat with this)

I am working on a crypto project and want you to help me create content for it.

Here are the details:

Project Name: [Project Name]

Ticker: \$[Ticker]

X: [X link or @handle]

Website: [Website link]

Telegram Channel: [Channel link]

Telegram Group: [Group link]

Brief Description: [1-2 sentences about the project or its utility/function. If it's utility based the more information the better. Especially around the features and what makes it unique]

Remember these details for all future requests in this chat.

🔧 **Editable:** Replace with your project's details. Remove anything you don't actually want added.

2. Promo Copy Generator (Option A: Quick Prompts)

Write promo content for my crypto project to fit the following categories in my LaunchCommand bot.

Respect the character limits for each category:

1. X (Twitter): ≤280 characters
2. Raid: ≤150 characters
3. TG Short: ≤350 characters
4. TG Long: ≤1024 characters
5. TG Text: ≤4096 characters

Each version should be unique and shill-ready. Include emojis and calls-to-action with [Channel link] and [Website link].

🔧 **Editable:** Change number of promos, adjust tone, links.

2B. Promo Copy Generator (Option B: JSON Template)

I will upload a blank promos.json template.

Please generate (#) unique pieces of content for each category in the file.

Requirements:

- Respect character limits (X = 280, Raid = 150, TG Short = 350, TG Long = 1024, TG Text = 4096).
- Each promo must be unique and high-energy.
- Use emojis (🚀🔥🐸💎👊).
- At least one promo per category must mention [Website link] and [Channel link].
- Keep JSON structure the same (category, title, text).
- Return valid JSON only, no commentary.

The result should be a ready-to-upload promos.json file.

🔧 **Editable:** Replace (#) with desired count. Adjust tone or categories.

3. About Page

Write an "About" page for my project.

- 1-paragraph mission statement
- 3-4 bullet points on unique value
- Tone: professional but hype
- Short enough for a Telegram bot page

 **Editable:** Bullet count, tone.

4. FAQ Page

Generate a FAQ for my project.

Include at least 6 Q&A covering:

- Token basics
- Roadmap overview
- Utility / use cases
- Team info (optional)
- Security/audits
- Community links

Keep answers short, clear, and formatted Q: / A:.

 **Editable:** Topics, number of Q&As, tone. Actual answers and questions you specifically want added.

5. Roadmap Page

Create a roadmap for my project with 4 phases:

Phase 1 – Launch + Community

Phase 2 – Marketing + Listings

Phase 3 – Utilities + Partnerships

Phase 4 – Scaling + Expansion

Each phase = 2–3 short bullet points.

 **Editable:** Number of phases, names, phase detail level.

6. Lite Whitepaper

Draft a 2-page lite whitepaper for my project.

Sections: Introduction, Vision, Tokenomics, Roadmap, Utility, Disclaimer.

Keep concise, PDF-ready, investor-friendly.

 **Editable:** Sections, length, tone. Key details.

7A. Terms of Use

These pages aren't legally binding but help set expectations with your community

Write a "Terms of Use" page for my project.

- Disclaimer: bot is "as is", not financial advice
- Users are responsible for trades/wallets
- External links = third-party, no liability
- Bot may be unavailable or outdated
- By using this bot, users accept the Terms

 **Editable:** Add clauses, adjust tone

7B. Privacy Policy

These pages aren't legally binding but help set expectations with your community

Write a "Privacy Policy" for my project.

- No data collected beyond Telegram username/ID
- No wallet keys stored
- Temporary logs may be kept but not shared
- Reference Telegram Privacy Policy: <https://telegram.org/privacy>
- By using the bot, users consent to this

🔧 **Editable:** Add analytics, adjust tone.

8. Shill Image/GIF Captions

Write 5 catchy captions for my project.

- 1 line each, meme-style
- Heavy emoji use (🚀🔥🐸💎👊)
- Copy-paste friendly

🔧 **Editable:** Emoji use: Heavy, Medium, Light, Number of captions, tone (meme-style, degen-style, professional-style), require ticker mentions.

✅ Quickstart Checklist & Flow

- ☐ Start with **Step 1 (Context Setup)**.
- ☐ Use **Step 2/2B** for **Shilling** content and promos.
- ☐ Generate **the custom pages you want**.
- ☐ Upload results into **LaunchCommand**.
